Fibrocem High Impact Render Systems

High Impact Resistant & Class 0 Fire Rated in only 2 Coats

Fibrocem High Impact Render is the most advanced wall protection system ever developed. It can deliver extraordinary durability and a class 0 Fire rating in only 2 coats.

Introduction

Fibrocem High Impact Render is a pre-mixed ready to use material with the addition of clean water the only requirement. The Fibrocem High Impact Render range is a 2 or 3 coat system that provides extraordinary durability and a class 0 fire rating. The application of Fibrocem High Impact Renders are similar to standard renders, requiring the use of a stainless steel trowel, and straight edge rule. **The Code of Practice for Renders BS 5262 1991 and NBS Building Specification section M20 should be followed.**

The Fibrocem render system helps architects, building owners and surveyors to comply with **Section B2** of the **Building Regulations** and fulfil their professional obligations under the **Regulatory Reform (Fire Safety) order (RRFSO)**.

Fibrocem Anti/graffiti – fire protection or Fibrocem Hygiene coatings are the recommended functional/decorative finishing coat system for the Fibrocem High Impact Render Systems. (Please see product overview and technical data sheet for more information)

Why use Fibrocem High Impact Render Systems?

Meets HM Prison Specification

Meets Metronet Specification

Extraordinary Durability

Outstanding Tensile Strength

Provides Longterm Protection

Independently Tested at Warrington Fire Research Centre

High Impact Protected & Class 0 Fire Rated in just

2 COATS

Independently tested by

OR

Part of the
Anti-Graffiti System

Security Render P1

Fibrocem High Impact Security Render, has been specifically designed for Prison cells, Police cells, Court holding cells and any type of Custodial suite. The system also meets the specification given by the home office. Fibrocem High Impact Security Render has outstanding tensile strength and resistance to impact and is therefore eminently suitable for use where destructive attack is likely to occur and extraordinary durability is a primary requirement and gives the substrate total high impact protection and a class 0 fire rating.

Underground Transport System Render

Fibrocem High Impact UTS Render has been specifically designed for Underground transport systems, its high density provides superior durability and resistance to air-borne pollutants, making it particularly suitable for use in industrial environments and underground transport systems where durability, resistance to attrition and atmospheric pollution are primary requirements. Fibrocem unique fibre technology gives the material extraordinary tensile strength and durability and delivers the unique characteristics required for today's non stop transport systems.

Fibrocem High Impact Universal Render

Fibrocem High Impact Universal Render has been designed to work in areas where general protection of the walls is a primary requirement, suitable for internal & external walls in school, hospitals, and factories and public buildings. Fibrocem High Impact Universal Render incorporates the, Fibrocem unique fibre technology that gives the material extraordinary tensile strength and durability and delivers the unique characteristics required for today's demanding buildings, therefore suitable for use where destructive attack and daily wear and tear is likely to occur.

Fibrocem Wall Protection Systems are designed to withstand the toughest conditions. Attractive and practical, every product has a proven track record of performance. With unique characteristics, tailor-made for tough environmental conditions, Fibrocem Protection Systems stand up to the most rigorous demands including graffiti, fire, impact, chemicals, climate and daily wear and tear. At Fibrocem we are committed to creating innovative products that stand the test of time.

Fibrocem Wall Protection Systems are both functional and decorative. They give your walls the protection they need to withstand today's environment but they also reduce the whole life cost of decoration. Modern, high-specification commercial and residential buildings demand quality products. But Fibrocem is more than just a materials supplier. We are dedicated to your needs and always on-hand to support and advise, so when you use a Fibrocem product we become your project partner.
